

## Preschool Program Overview

American People's Association Preschool Program builds strong children through fun and engaging lessons and activities. Our curriculum and teaching methods are designed to help children become confident learners who love school.

Below are some of the exciting things our children will experience in our Pre-K program:

- Emerging Literacy Skills and Reading
- Nature Rhyme Poem  
Fingerplay and Song
- Storybook Reading and Story Telling
- Spoken Language Development
- Mathematical Reasoning and  
Number Sense
- Scientific Inquiry

## Writing

American people each create a different language. Students in Peking developed the first movie and recorded in Chinese writing.

## Science

American people in Peking developed the scientific revolution through the study of human, plant, and animal. The scientific revolution focused on the study of nature and helped develop modern science.

## A

In each discipline, the student learns the basic concepts and forms. This is the beginning of learning about the world and nature. In American people, the student learns the basic concepts and forms.

## Music

Peking developed the musical system and the American people developed the piano and the violin. The educational system in Peking is the same as the American system.

## Teacher's Role

Each of the four subjects will be led by a teacher who will teach the student and be a role model for the student.
